SUMMARY

Financial Analyst with 4+ **years of experience** shaping forecasting, budgeting, and valuation models across healthcare and supply-chain operations. Proficient in **Excel (Power Query, VBA), SQL, and Power BI** to deliver precise financial insights across P&L, GAAP reporting, and investment analysis. At **UnitedHealth Group**, improved forecast accuracy and cash-flow reliability through advanced cost modeling and scenario-based planning. At **Adons Softech**, optimized logistics and inventory economics by automating cost-to-serve analytics and uncovering **\$5.2M** in operational savings. Adept at translating complex data into decisions that strengthen profitability and executive visibility.

SKILLS

- **Financial Modeling & Valuation:** Driver-based Models, DCF Models, LBO Models, Valuation, Scenario Planning, Sensitivity Analysis, Peer Benchmarking, Precedent Transaction Analysis, Monte Carlo Simulation, Merger Modeling, NAV Modeling, Discounted Cash Flow, Terminal Value Calculation
- **Financial Analysis & Reporting:** Forecasting, Variance Analysis, P&L Analysis, Budgeting, Financial Reporting, ROI Evaluation, Capital Allocation, Cash Flow Analysis, Cost-Benefit Analysis, Trend Analysis, Financial Statement Analysis, Variance Reporting, Budget Variance Analysis
- **Data Analysis & Tools:** Excel, SQL, Power BI, Oracle ERP, Power Query, Pivot Tables, Data Reconciliation, Data Visualization, Statistical Analysis, Tableau, VBA, Data Mining
- **Healthcare & Investment Finance:** Medicare, Commercial Lines, Claims Data, Risk-Adjustment Testing, Premium Filings, Deal Execution, Leverage Scenarios, Repayment Sensitivity, Investment Briefs, EBITDA Variance Analysis, Reimbursement Analysis, Healthcare Valuation, Due Diligence

EXPERIENCE

UnitedHealth Group | Financial Analyst

Aug 2024 - Current

- Built **forecasting and cost-projection models** in **Excel (Power Query, VBA)** integrating claims, utilization, and OPEX data; improved forecast precision by **11% YoY** across business units.
- Conducted **variance, trend, and margin analysis** on multi-entity **P&L statements**, identifying controllable expense deviations worth **\$3.8 M** and driving corrective budget actions.
- Streamlined monthly **financial close and consolidation** by reconciling GL and claims system data in compliance with **GAAP**; reduced reporting turnaround by **3 business days**.
- Designed **DCF and ROI evaluation models** to assess new provider-network and telehealth initiatives; findings influenced **\$17 M** in capital allocation decisions.
- Partnered with FP&A and actuarial teams to build **multi-scenario budget frameworks** for utilization, pricing, and revenue sensitivity testing.
- Deployed **Power BI dashboards** connected to SQL datasets to visualize expense ratios, MLR, and profitability trends, enhancing CFO-level visibility into operating performance.
- Designed **rolling 12-month forecasting models** incorporating seasonality, claims lag, and provider cost trends; enhanced predictability of quarterly **EBIT and cash-flow projections** by **10%**.

Adons Softech | Financial Analyst

Mar 2019 - Jul 2022

- Performed **variance and margin analysis** across logistics and distribution centers to identify **\$5.2 M** in controllable OPEX tied to freight and warehousing inefficiencies.
- Developed **supplier-performance dashboards** in **Power BI** integrating ERP and SQL data; enhanced visibility into lead times, cost-per-shipment, and contract compliance across 12 vendors.
- Partnered with supply-planning and operations teams to design **scenario-based budgeting frameworks** for transportation, procurement, and workforce allocation under fluctuating fuel costs.
- Built **inventory and procurement cost models** in **Excel (Power Query, Solver)** to forecast SKU-level demand and carrying costs; reduced excess stock by **14%** while improving fulfillment accuracy.
- Conducted **GAAP-compliant month-end close** activities, reconciling COGS, inventory valuation, and freight accruals to ensure accurate P&L and balance-sheet representation.
- Built **ROI and DCF models** to evaluate capital investments in automation and cold-chain upgrades; insights guided **\$22 M** in strategic asset redeployment.
- Automated **cost-to-serve analytics** using Python and SQL to quantify unit economics across SKUs and geographies; findings improved pricing and replenishment decisions, boosting EBIT by **9%**.

EDUCATION

Masters in Data Analytics

Jan 2023 – Dec 2024

Webster University, St Louis, MO
